

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**Dated: May 27, 2016**

**MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING**

This interim management's discussion and analysis ("MD&A") reports on the operating results and financial condition of NEMI Northern Energy & Mining Inc. (the "Company" or "NEMI") for the six months ended March 31, 2016 and is prepared as at May 27, 2016. This interim MD&A should be read in conjunction with the Company's audited annual financial statements for the years ended September 30, 2015 and 2014 and the notes thereto which were prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standard Board ("IASB"), together with the unaudited condensed interim consolidated financial statements as at and for the six months ended March 31, 2016, which were prepared in accordance with IFRS and in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting (collectively referred to as the "Financial Statements"). Other information contained in these documents has also been prepared by management and is consistent with the data contained in the Financial Statements.

All dollar amounts referred to in this MD&A are expressed in Canadian dollars except where indicated otherwise.

**APPROVAL**

The Company's certifying officers, based on their knowledge, having exercised reasonable diligence, are also responsible to ensure that these filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the periods reported. The Financial Statements together with the other financial information included in this MD&A fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented in this MD&A. The Board's review is accomplished principally through the Audit Committee, which meets periodically to review all financial reports, prior to filing. The Board of Directors has approved the Financial Statements and MD&A, as well as ensured that management has discharged its financial responsibilities.

**CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION**

This MD&A includes "forward-looking statements", within the meaning of applicable securities legislation, which are based on the opinions and estimates of Management and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding the direction of our business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions, or other future performance suggested herein.

Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "budget", "plan", "continue", "estimate", "expect", "forecast", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar words suggesting future outcomes or statements regarding an outlook. These statements involve known and unknown risks,

# **NEMI NORTHERN ENERGY & MINING INC.**

## **INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**

### **AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. These forward looking statements include but are not limited to statements concerning:

- The Company's success at completing future financings
- The Company's strategies and objectives
- The Company's cost reductions and other financial operating objectives
- The availability of qualified employees for business operations
- General business and economic conditions
- The Company's ability to meet its financial obligations as they become due
- The Company's ability to identify, successfully negotiate and/or finance an acquisition of a new business opportunity
- The positive cash flows and financial viability of new business opportunities
- The Company's ability to manage growth with respect to a new business opportunity
- The Company's tax position, anticipated tax refunds and the tax rates applicable to the Company

Readers are cautioned that the preceding list of risks, uncertainties, assumptions and other factors are not exhaustive. Events or circumstances could cause actual results to differ materially from those estimated or projected and expressed in, or implied by these forward looking statements. Due to the risks, uncertainties and assumptions inherent in forward-looking statements, investors in securities of the Company should not place undue reliance on these forward-looking statements.

## **OVERVIEW AND OUTLOOK**

NEMI Northern Energy & Mining Inc. (the "Company" or "NEMI") was continued under the Business Corporations Act (British Columbia) on April 15, 2010. Previously NEMI was incorporated under the Business Corporations Act of Alberta and extra-provincially registered under the Company Act of British Columbia. The Company is the ultimate parent.

The Company's head office is located at 1600 – 609 Granville Street, Vancouver, British Columbia V7Y 1C3 and its registered and records office is located at 2500-700 West Georgia Street, Vancouver, British Columbia V6C 3E8.

NEMI's common shares trade on the Canadian Securities Exchange ("CSE") under the trading symbol "NNE".

NEMI is a specialized merchant bank whose principal activity is the development of its asset and equity portfolio. Although NEMI retains the flexibility to make any investments which management determines are in its best interests, NEMI's primary target investments are shares of small-cap and micro-cap public companies which NEMI's management believes are undervalued. The ultimate objective of these investments is to maximize the Company's return. The Company operates as one segment.

On October 1, 2013, the Company acquired a 100% interest in ACME Mining Inc. ("ACME") a privately held US based company incorporated by the CEO of the Company for a nominal amount. ACME had no assets or liabilities, nor an active business at the date of acquisition. The Company intends to use ACME to enhance its existing diversified investment and merchant banking operations.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

**Investing activities**

It is the Company's policy to recognize its investments at fair value as current assets recorded at their quoted or estimated fair value. At the end of each reporting period, the Company compares the current carrying values with the quoted market value or estimated fair values and the difference which is known as a "mark-to-market" adjustment is recognized in income as an unrealized gain or loss with an offset in an equal amount to the carrying value of the investments at fair value.

As at March 31, 2016, the Company held investments at fair value for investment purposes having a fair value of \$5,771,275 (cost - \$10,669,793) detailed as follows:

	March 31, 2016		September 30, 2015	
	Fair value	Cost	Fair value	Cost
	\$	\$	\$	\$
Publicly traded securities	5,077,115	6,027,540	4,911,261	6,402,605
Private equity securities	694,160	4,444,160	435,000	4,185,000
Loans	-	198,093	2,734,427	2,932,520
	<b>5,771,275</b>	<b>10,669,793</b>	<b>8,080,688</b>	<b>13,520,125</b>

Changes in the Company's investments at fair value for the six-month period ended March 31, 2016 were as follows:

	March 31, 2016	September 30, 2015
	\$	\$
Opening balance	8,080,688	13,254,476
Purchases	2,762,323	5,760,210
Distributions received	(295,978)	(1,304,047)
Proceeds on disposition	(4,166,796)	(4,334,097)
Realized losses on disposition	(1,188,466)	(828,778)
Foreign exchange gains	38,584	774,675
Unrealized gains (losses)	540,920	(5,241,751)
Balance	<b>5,771,275</b>	<b>8,080,688</b>

As the Company carries its investments at fair value on the fair value through profit or loss basis, the above referenced realized and unrealized losses totaling (\$647,546) (September 30, 2015 - (\$6,070,529)) have been recognized in income for the six months ended March 31, 2016.

**Publicly traded securities and loans**

The Company's publicly traded securities can be sold at any time at the Company's discretion subject to market conditions and from time to time hold period restrictions of not more than four months pursuant to the terms of each respective private placement subscription agreement, as well as escrow restrictions, if applicable.

**American Bonanza Gold Corp ("BZA") and Kerr Mines Inc. ("KER")**

During the year ended September 30, 2012, the Company extended a US\$1,500,000 loan to American Bonanza Gold Corporation ("BZA"), a publicly traded resource company bearing interest at 12% per annum. In addition,

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

the terms also provided that the Company could elect to receive any payments on principle otherwise due in the form of 1,250 London good delivery gold ounces ("Gold Ounces") at a stated price of US\$1,200 per ounce (the "Gold Call Option"). In addition, NEMI secured 1,500,000 BZA common share purchase warrants exercisable at a price of \$0.50 each (expired).

During the year ended September 30, 2013, the Company advanced an additional US\$200,000 to BZA, and a further US\$400,000 in consideration for an Amended and Restated Secured Promissory Note and Guarantee bringing the total principal advanced to BZA up to US\$2,100,000 (the "Amended BZA Gold Loan"). Among the amended and revised terms and conditions provided was a reduction in the strike price of the Gold Call Option to US\$1,100 per ounce meaning the potential number of Gold Ounces to be delivered increased from 1,250 ounces to 1,909 ounces. In addition, NEMI secured another 600,000 BZA common share purchase warrants exercisable at a price of \$0.20 each (expired). Under the terms of the Amended BZA Gold Loan, the maturity date was extended to August 1, 2014. All other terms and security granted under the terms of the Amended BZA Gold Loan remained substantially unchanged from the provisions of the original agreement.

During the year ended September 30, 2014, BZA, NEMI and the other Gold Loan lenders amended and restated the secured US\$8,601,000 promissory note (of which US\$2,100,000 was due to NEMI). The amended promissory note was restructured to be repaid commencing January 1, 2014 in twelve equal principal monthly installments completing on December 1, 2014. The strike price of the Gold Call Option was reduced to US\$900 per ounce which if exercised would result in the delivery of 9,557 gold ounces (2,333 gold ounces to NEMI) or equivalent cash, at the option of the lender. Interest payments were deferred to January 1, 2014. On January 3, 2014, NEMI sent BZA a notice of default after not receiving the agreed upon payments.

On April 14, 2014, BZA announced it had entered into a definitive agreement with Kerr Mines Inc. ("KER"), an arm's length company, for a merger of the two companies' operations. The agreement was approved by BZA shareholders on June 20, 2014, and by the Supreme Court of British Columbia on June 25, 2014 (the "Arrangement Transaction").

On May 1, 2014, NEMI and BZA entered into an agreement pursuant to which NEMI agreed to settle the full amount of the Amended BZA Gold Loan, including all accrued interest thereon in consideration of BZA issuing 48,762,489 common shares of BZA and a secured promissory note from KER in the principal amount of US\$2,100,000 to NEMI (the "KER Promissory Note"). The KER Promissory Note bore interest at a rate of 6% per annum, with six semi-annual payments of principal and interest of US\$410,914 each commencing on June 20, 2015 (received on July 15, 2015).

During the year ended September 30, 2014, the 48,762,489 common shares of BZA were converted into 25,844,120 shares of KER per the Arrangement Transaction, which were later consolidated into 1,722,939 shares upon the share consolidation completed by KER of its outstanding common shares.

The KER Promissory Note is secured under a General Security Agreement by a pledge of the assets and share capital of Bonanza Explorations Inc., an operating subsidiary of KER (upon completion of the Arrangement Transaction). During the year ended September 30, 2014, the Company recorded a gain of \$750,544 as a result of the transaction, included in gain on investments at fair value. The Company holds the right, at its option, to convert the whole, or any part of the loan, into common shares of KER at a conversion price of \$0.06 per share on a post consolidated basis.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

As a result of the late KER Promissory Note payment received on July 15, 2015, the KER Promissory Note was in default. Under the terms of the KER Promissory Note, the entire outstanding principal amount, including interest due thereon totalling US\$2,465,484, was accelerated and became immediately due and payable. In connection with collection of the outstanding amounts owing, NEMI and KER negotiated an amendment to the Note (the "Amended KER Promissory Note"), pursuant to which the remaining outstanding principal amount and interest currently due thereon, revised to US\$2,054,570 will accrue interest at a rate of 8% per annum and would become due on December 15, 2015.

On March 2, 2016 NEMI finalized a Note Purchase Agreement with Tamimi Investment and Mining Company ("Tamimi") whereby NEMI assigned the amount (Principle and accrued interest of \$2,138,329 USD) owed by Kerr to the Company to Tamimi for proceeds of \$1,875,000 USD. Payment was received from Tamimi on March 2, 2016; the loss of \$354,652 resulting from this transaction has been included in the Company's net loss for the period ended March 31, 2016.

As of March 2, 2016 this loan has been completely repaid. During the history of this loan, from September 2012 to March 2016, NEMI has earned a net return of \$515,796 USD (24.56%) on the principle amount of \$2,100,000 USD.

**Vangold Resources Ltd. ("VAN")**

As at March 31, 2016, the Company holds 675,000 warrants in VAN valued at \$Nil (2015 - \$Nil). The warrants were valued using the residual value approach; 250,000 are due to expire in fiscal 2016 and 425,000 are due to expire in fiscal 2017.

**Private equity securities**

**Black Eagle Mining Corporation ("BEM")**

BEM is a private company incorporated under the laws of British Columbia and holds a 100% interest in certain applications forming the Blackstone metallurgical coal project in Alberta purchased pursuant to an agreement between BEM and Rio Tinto Exploration Canada Inc.

On March 16, 2012, NEMI acquired 5,000,000 common shares of BEM in a private placement for a total cash consideration of \$3,750,000 or \$0.75 per share. On completion of the acquisition, NEMI's CEO was appointed to the BEM board of directors.

As at March 31, 2016, the Company held 5,200,000 common shares (2015-5,200,000) representing 14.6% (2015-14.6%) of the outstanding share capital of BEM. The fair value of these common shares was determined to be \$nil (2015-\$1.20 per share). This valuation was based on the fact that BEM's project has been placed on indefinite hold and BEM has placed this project on care and maintenance until the market for its resource improves and it can find additional financing. Accordingly, the Company's net loss for the year ended September 30, 2015, included an unrealized mark to market loss of \$6,240,000 to adjust the fair value of the shares to \$nil.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**Belhara Security Systems ("Belhara")**

As at March 31, 2016, the Company held 132,000 shares in Belhara valued at \$Nil (2015 - \$Nil). The shares were acquired in fiscal 2013 as consideration for a sub-lease agreement and their cost and fair value were written down to \$Nil during the year ended September 30, 2013.

**Voleo Inc. (formerly Unlout Enterprises Inc.) ("Voleo")**

As at March 31, 2016, the Company held 2,175,000 shares (2015 - 2,000,000) in Voleo valued at \$435,000 (2015 - \$100,000).

During the year ended September 30, 2014, the Company acquired 2,000,000 shares for cash in the amount of \$100,000, or \$0.05 per share. Furthermore, the Company purchased a \$90,000 loan owed to Voleo by a third party for \$45,000. The Company received a first installment of \$30,000 from Voleo toward the balance of this debt. As at September 30, 2014, the remaining \$15,000 was included in accounts receivable.

During the year ended September 30, 2015, the Company extended the terms of the loan, and the Company and Voleo agreed to repayment of \$60,000 (representing the original \$90,000 loan, less \$30,000 which had been repaid to the Company by Voleo during the year ended September 30, 2014). The Company received a payment of \$25,000 from Voleo reducing the remaining balance of the loan to \$35,000. The Company subscribed to 175,000 shares of Voleo at \$0.20 per share for a subscription cost of \$35,000 which was offset against the remaining balance of the loan, bringing the amount owed by Voleo to \$nil.

The total cost of the 2,175,000 shares acquired over the past two fiscal years is \$135,000. The fair value of these common shares was determined to be \$0.20 per share, or \$435,000. This valuation was based on the observable \$0.20 per share price used in a financing Voleo completed during the year ended September 30, 2015.

**United Community Bancshares ("Bancshares")**

As at March 31, 2016, the Company held 141,700 common shares and 583 preferred shares in Bancshares valued at \$259,160 (2015 - \$Nil). The shares were acquired in March 2016 for \$200,000 USD. The valuation was based on the observable price per common and preferred share used in a financing Bancshares completed in March 2016.

NEMI is a specialized merchant bank whose principal activity is the development of its asset and equity portfolio. Although NEMI retains the flexibility to make any investments which management determines are in its best interests, NEMI's primary target investments are shares of small-cap and micro-cap public companies which NEMI's management believes are undervalued. The ultimate objective of these investments is to maximize the Company's return. The Company's management consists of a full-time CEO and a contracted CFO who is retained through a company that provides outside accounting services. For the current fiscal year and going forward for the foreseeable future, the corporate operating cost structure is comparatively simple, consisting primarily of remuneration and benefits paid to management, professional fees that cover legal and audit costs, expenditures required to sustain the Company's status as a reporting publicly listed entity, office expenses and fees paid to outside directors and out-of-pocket travel and accommodation expenses.

Since the PRC disposition on September 28, 2011 and the completion of a liquidity event that culminated in the completion of the Substantial Issuer Bid ("SIB") on December 28, 2011 where the Company purchased and subsequently cancelled 38 million common shares at a price of \$1.06 each for an aggregate gross consideration of \$40,434,359 the Company's assets have remained relatively stable over the past three fiscal years; the large drop in assets between fiscal 2014 and fiscal 2015 was largely due to the fact the Company suffered a mark to market loss in the value of its investment in Black Eagle Mining ("BEM") (\$6,240,000) as BEM's project has been placed on indefinite hold and been placed on care and maintenance until the market for its resource improves and it can find additional financing. The large swing in comprehensive income (loss) between the 2013 and 2015 fiscal years was mostly due to fluctuations in the unrealized and realized gains and losses stemming from the Company's investment in Black Eagle Mining shares and trading of various publicly traded securities.

**RESULTS OF OPERATIONS FOR THE THREE AND SIX MONTHS ENDED MARCH 31, 2016**

The following is an analysis of the Company's operating results for the three and six months ended March 31, 2016, and includes a comparison against the three and six months ended March 31, 2015.

**Comprehensive income (loss)** for the three and six months ended March 31, 2016 amounted to (\$341,915) and (\$399,296) or (\$0.02) and (\$0.02) loss per share (basic and diluted), respectively (2015 – \$1,269,801 and \$850,916 or \$0.08 and \$0.05 income per share (basic and diluted), respectively) based on a weighted average number of shares outstanding of 15,979,152 and 16,015,401 common shares, respectively (basic and diluted) (2015- 16,662,891 basic and 16,842,685 diluted and 16,692,834 basic and 17,117,322 diluted, respectively).

**Income (losses) on investments at fair value** for the three and six months ended March 31, 2016 were \$72,447 and (\$647,546), respectively compared to \$839,971 and \$265,026, respectively for the same periods in the previous year. The income (losses) resulted from investing activities of the Company in its publicly traded securities portfolio.

**Interest and other income** for the three and six months ended March 31, 2016 was \$33,058 and \$533,891, respectively compared to \$123,179 and \$179,279, respectively for the same periods in the previous year. Included in this income amount is interest, dividends and other income. Dividend income was higher in the current period due to more dividends being paid out on the Company's investments in publicly traded securities.

**Remuneration and benefits** for the three and six months ended March 31, 2016 were \$50,284 and \$90,340, respectively compared to \$40,290 and \$80,290, respectively for the same periods in the previous year. All remuneration and benefits relate to the salary paid to the CEO.

**Office expenses** for the three and six months ended March 31, 2016 were \$28,845 and \$58,178, respectively compared to \$36,362 and \$64,792, respectively for the same periods in the previous year. Office expenditures include expense items such as insurance, office supplies and contracted accounting services.

**Shareholder communication** expenses for the three and six months ended March 31, 2016 were \$1,672 and \$2,121 compared to \$3,145 and \$4,821 for the same periods in the previous year. Shareholder communications include stock transfer fees and all shareholder mailing and search expenditures.

**Director's fees** for the three and six months ended March 31, 2016 were \$8,000 and \$16,000 compared to \$10,000 and \$20,000 for the same periods in the previous year. Director's fees are lower as one of the directors resigned on June 28, 2015 and a replacement has yet to be named.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**Foreign exchange gains (losses)** for the three and six months ended March 31, 2016 were (\$370,325) and (\$252,656), respectively as compared to \$396,150 and \$562,006, respectively for the same periods in the previous year. This figure will fluctuate with any change in the exchange rate of the US dollar given that as at March 31, 2016 NEMI has \$1,745,309 USD in publicly traded investments, \$200,000 USD in private equity securities, and \$1,165,452 USD in cash accounts.

**Interest and bank charges** for the three and six months ended March 31, 2016 were \$2,729 and \$7,250, respectively compared to \$ 5,184 and \$5,576, respectively for the same periods in the previous year. The charges were lower in the current period due to lower broker interest paid in the Company's investment accounts.

**Professional fees** for the three and six months ended March 31, 2016 were \$22,905 and \$23,066, respectively compared to \$ 29,090 for the same periods in the previous year. Professional fees include accounting and legal fees incurred during the period.

## **RISKS AND UNCERTAINTIES**

Investors should be aware that an investment in the common shares of the Company involves a high degree of risk. In addition to the other information contained in this MD&A, investors should consider carefully the following risk factors with regard to an investment in the common shares of the Company:

### **New Enterprise**

NEMI has only recently commenced evaluating new business and investment opportunities and has no history of earnings in this endeavor. There is no assurance that any investment in marketable securities or other securities held for trading acquired by NEMI will achieve intended objectives, generate earnings, operate profitably or provide a return on investment in the future or that the concept will be successful or sustainable.

### **Concentration of Investments**

Other than as disclosed in this MD&A, there are no restrictions on the proportion of Company funds and no limit on the amount of funds that may be allocated to any particular investee company, industry or sector. NEMI may participate in a limited number of investments and, as a consequence, financial results may be adversely affected by the unfavorable performance of a single investment, or sector. Completion of one or more investments may result in NEMI having a disproportionate investment in a particular investee company, business, industry or sector could result in a disproportionately high concentration of investment risk exposure associated with one particular investment.

### **Illiquid Marketable and other Securities Held for Trading**

NEMI may invest in illiquid marketable and other securities held for trading in both public and private issuer investees respectively. A considerable period of time may elapse between the time a decision is made to sell such securities and the time NEMI is able to do so, and the value of such securities could decline while awaiting disposition. Illiquid investments are subject to various risks, particularly the risk that NEMI will be unable to realize its investment objectives by sale or other disposition at attractive prices or otherwise be unable to complete any exit strategy. In some cases, NEMI may be prohibited by contract or by law from selling such

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

securities for a period of time or otherwise be restricted from disposing of such securities. Furthermore, the types of investments made may require a substantial length of time to liquidate.

In addition to investments in privately held companies, NEMI may also make direct investments in publicly traded investee securities that have low trading volumes. Accordingly, it may be difficult to make trades in these securities without adversely affecting the price of such securities.

**Available Opportunities and Competition for Investments**

The success of NEMI's operations will, among other things depend upon: (i) the availability of appropriate investment opportunities; (ii) NEMI's ability to identify, select, acquire, grow and exit those investments; and (iii) NEMI's ability to generate funds for future investments. NEMI can expect to encounter competition from other entities that have investment objectives similar to those of the Company, including investment funds, institutional investors and strategic investors. These groups may compete for the same investments as NEMI, may be better capitalized, have more personnel, have a longer operating history and have different return targets from NEMI. As a result, NEMI may not be able to compete successfully for investments. In addition, competition for investments may lead to the price of such investments increasing which may further limit NEMI's ability to generate desired returns. There can be no assurance that there will be a sufficient number of suitable investment opportunities available to NEMI to invest in or that such investments can be made within a reasonable period of time. There can be no assurance that NEMI will be able to identify suitable investment opportunities, acquire them at a reasonable cost or achieve an appropriate rate of return. Identifying attractive opportunities is difficult, highly competitive and involves a high degree of uncertainty. Potential returns from investments will be diminished to the extent that NEMI is unable to find and make a sufficient number of investments.

**Share Prices of Investments**

NEMI's investments in marketable securities of public companies and other securities held for trading are subject to volatility in the share prices of investee companies. There can be no assurance that an active trading market for any of the investee shares is sustainable. Investee share trading prices could be subject to wide fluctuations in response to various factors beyond NEMI's control, including quarterly variations in investee company results of operations, changes in earnings (if any), estimates by analysts, prevailing conditions in investee industries and general market or economic conditions. In recent years, equity markets have experienced extreme price and volume fluctuations. These fluctuations have had a substantial effect on market prices, often unrelated to the operating performance of specific companies. Such market fluctuations could adversely affect the market price of NEMI's marketable security portfolio as well as that of its own common shares.

**No Guaranteed Return**

There is no guarantee that a NEMI investment in marketable other securities held for trading will earn any positive return in the short term or long term. The task of identifying investment opportunities, monitoring such investments and realizing a significant return is difficult. Many organizations operated by persons of competence and integrity have been unable to successfully make, manage and realize a return on such investments.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**Due Diligence**

The due diligence process NEMI undertakes in connection with investments may not reveal all facts that may be relevant to making an investment. Before making investments, although NEMI conducts due diligence that management deems to be reasonable and appropriate based on the facts and circumstances applicable to each investment, there can be no assurance that the due diligence will identify all of the risks and perils associated with the investment. When conducting due diligence, NEMI may be required to evaluate important and complex business, financial, tax, accounting, environmental and legal issues. The assistance of outside consultants, legal advisors, accountants and investment banks may be required in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence and making an assessment regarding an investment, NEMI will rely on the resources available to the Company, including information provided by the investee target company and, in some circumstances, third-party investigations. The due diligence investigation that NEMI completes with respect to any investment opportunity may not reveal or highlight all relevant facts that may be necessary or helpful in evaluating such investment opportunity. Moreover, such an investigation can be costly and will not necessarily result in the investment being successful.

**Cash Flow / Investment Income**

NEMI generates cash flow and investment income primarily from proceeds received on disposition of investments, interest earned on cash and cash equivalents, and financing activities. The availability of these sources of income and the amounts generated from these sources are dependent upon various factors, many of which are outside of NEMI's direct control. NEMI liquidity and operating results may be adversely affected if the Company's access to the capital markets is hindered, whether as a result of a downturn in the market conditions generally or to matters specific to NEMI, or if the value of the investments at fair value declines, resulting in capital losses on disposition.

**Volatility of Share Price**

The market price of NEMI's Common Shares has been and may continue to be subject to wide fluctuations in response to factors such as actual or anticipated variations in the Company's consolidated results of operations, changes in financial estimates by securities analysts, general market conditions and other factors. Market fluctuations, as well as general economic, political and prevailing market conditions such as recessions, interest rate changes or international currency fluctuations may adversely affect the market price of NEMI's Common Shares. The purchase of NEMI Common Shares involves a high degree of risk and should be undertaken only by investors whose financial resources are sufficient to enable them to assume such risks and who have no need for immediate liquidity in their investment.

**Need for Additional Capital and Access to Capital Markets**

NEMI anticipates that it has sufficient resources to meet its current obligations, however future investments by NEMI may require a significant infusion of additional funds. Further financing may dilute the current holdings of shareholders and may thereby result in a loss for shareholders.

There can be no assurance that NEMI will be able to obtain adequate financing, or financing on terms that are reasonable or acceptable for these or other purposes, or to fulfill the Company's future obligations as they become due. Failure to obtain such additional financing could result in delay or indefinite postponement of further investment or growth in NEMI's marketable securities portfolio.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**Non-Controlling Interests**

NEMI investments in marketable and other securities held for trading will more likely than not include equity securities of companies over which NEMI holds little control or significant influence. These securities may be acquired by NEMI in the secondary market or through purchases of securities from an investee company. Any such investment is subject to the risk under which investee companies operate or they may make business, financial or management decisions with which NEMI does not agree. When or if any of the foregoing occurs, the value of the NEMI investment in marketable and other securities held for trading could decline to the detriment of the Company's financial position, results of operations and cash flows and NEMI share prices.

**Reliance on Management's Expertise**

NEMI is dependent upon the effort, skill and business contacts of key members of its management, for among other things, the information and deal flow they generate during the normal course of their activities and the synergies which exist amongst their various fields of expertise and knowledge. Accordingly, NEMI's continued success will depend upon the continued service of these individuals who are not obligated to remain employed with the Company. The loss of the services of any one or more of these individuals could have a material adverse effect on revenues, net income and cash flows and growth outlook including NEMI's ability to maintain or grow existing assets, raise additional funds or find new investment opportunities in the future. NEMI does not have any key person insurance in place for management.

**No On-Going Active Business Operations**

Currently the Company has minimal assets other than cash, investment in marketable and other securities held for trading and is unlikely to generate any earnings or pay dividends until at least after its cash is more fully invested or in the alternative; a new business interest is secured. Further, no assurance can be provided that such new business interests can be secured or that any business interest that may be secured can be operated profitably or that the Company's investment activities in marketable and other securities held for trading will generate asset value growth that could result in positive cash flow, or that any future dividends could or would ever be paid.

**Adverse Income Tax Assessments**

In the process of recognizing the income earned on the PRC Disposition on September 28, 2011, the Company did not recognize any resulting income tax liability. Although the Company has relied on the advice of expert advisors in its determination and treatment of the gain on disposal, no assurance can be provided that the Company will not be subject to adverse income tax assessments and / or penalties on assessment and while management believes that it has retained sufficient resources on hand to address such a contingency, no assurance can be provided that the amount so retained will be sufficient or can be retained until the assessment is definitive.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**NEMI Stock Liquidity and Trading Price of Common Shares Relative to Profit and/or Net Asset Value**

No assurance can be provided that an active and liquid market for the Company's common shares will be sustained and that the market accurately reflects the value of the shares. Investors may find it difficult to resell their shares.

**Highly Speculative**

Under normal circumstances, as stated elsewhere herein, an investment in NEMI's common shares is highly speculative. Further, the present stage of corporate development makes an investment in the Company's shares that much more highly speculative.

**Limited Resources**

The company has only a set amount of money and management resources with which to identify and acquire potential business opportunities and there can be no assurance that the Company will be able to identify a suitable business opportunity. Further, even if such a opportunity is identified, there can be no assurance that the company will be able to successfully complete the transaction and implement a profitable business plan.

While the Company currently has sufficient working capital available to it, the Company's ability to secure or operate any new business opportunity may require additional financing. The Company may not be able to secure financing on terms acceptable to it, if at all. Failure of the Company to secure sufficient financing could result in delays or prohibit the Company from securing a proposed business opportunity or proposed operations and could result in the Company going out of business.

**Potential for Interest Dilution**

A transaction for a new business opportunity may be financed in all or in part by the issuance of additional securities by the Company and this may result in dilution to a shareholder's interest, which dilution may be significant and which may also result in a change of control of the Company.

**Ability to Secure Prerequisite Approvals**

In the event that a suitable business or a marketable security investment opportunity is identified, the transaction may be subject to approvals by regulatory authorities and, in the case of a non-arms length transaction, approval by the majority of any minority shareholders.

**Shareholder rights**

Unless a shareholder has a right to dissent and be paid fair value in accordance with applicable corporate or other law, a shareholder who votes against a proposed business marketable security investment opportunity for which a majority of minority shareholders have given approval, will have no rights of dissent and no entitlement to payment by the Company of fair value for the common shares.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**Ability to retain a listing on a recognized stock exchange and possibility of trading halts or suspensions**

Although the Company's shares now trade on the CSE, trading in the common shares of the Company may be halted or suspended from time-to-time for any number of reasons, including for failure by the Company to submit documents to the applicable regulatory authorities within required time periods.

**Foreign operations and management residency**

In the event that management of the Company resides outside of Canada or the Company identifies a foreign business opportunity, investors may find it difficult or impossible to effect service or notice to commence legal proceedings upon any management resident outside of Canada or upon the foreign business and may find it difficult or impossible to enforce any judgments obtained in Canadian courts against such persons or businesses.

**Conflicts of interest**

There are potential conflicts of interest to which some or all of the directors, officers, or insiders of the Company could be subject in connection with the operations of the Company. The directors and officers of the Company will not be devoting all of their time to the affairs of the Company. Some of the directors and officers of the Company are directors and officers of other companies. Some of the other companies are engaged in or could be engaged in the search for properties or business prospects that may be suitable business ventures or opportunities that could be of interest to the Company. Accordingly, situations may arise where some or all of the directors, officers or insiders of the Company could be in direct competition with the Company. The directors and officers of the Company are required by law to act in the best interest of the Company. They have the same obligations to other companies in respect of which they act as directors and officers. Discharge by the directors and officers of their obligations to the Company may result in a breach of their obligations to other companies, and in certain circumstances, this could expose the Company to liability to those companies. Similarly, discharge by the directors and officers of their obligations to the other companies could result in a breach of their obligation to act in the best interests of the Company. Such conflict in legal obligations may expose the Company to liability to others and impair its ability to achieve its business objectives. Conflicts will be subject to the procedures and remedies as provided under the British Columbia Business Corporations Act.

**LIQUIDITY AND CAPITAL RESOURCES**

The Company defines capital that it manages as cash and equity, consisting of issued common shares, share-based payment reserve and stock options. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, to fund existing operations and the search for new business opportunities in order to provide returns to its shareholders. The Company does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain the future development of the business. The Company manages and adjusts its capital structure as a result of changes in economic conditions. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to any externally imposed capital requirements or debt covenants. There was no change to the Company's approach to capital management during the period ended March 31, 2016.

As at March 31, 2016, the Company had working capital of \$10,772,915 (September 30, 2015 - \$11,288,777) including cash that totaled \$5,139,778 (September 30, 2015 - \$3,370,97). At this time management believes that

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

this is sufficient to meet currently expected operating requirements over the next year and does not foresee any circumstances under which additional financing would be required.

A summary of the Company's cash flows during the six-month period ended March 31, 2016 and 2015 is as follows:

	<b>2016</b>	2015
Cash flows provided by (used in) operating activities	\$ <b>1,722,277</b>	\$ (46,329)
Cash flows used in financing activities	<b>(116,566)</b>	(87,108)
Effect of exchange rate on cash	<b>163,970</b>	55,134
Increase (decrease) in cash for the period	<b>1,769,681</b>	(78,303)
Cash, beginning of the period	<b>3,370,097</b>	3,656,587
Cash, end of the period	\$ <b>5,139,778</b>	\$ 3,578,284

**Cash flows provided by (used in) operating activities** were \$1,722,277 for the six-month period ended March 31, 2016 compared to (\$46,329) during the six-month period ended March 31, 2015. The \$1,768,606 increase in cash provided in 2016 as compared to the 2015 period was primarily due to the sale of the KER Note for proceeds of \$1,875,000 USD.

**Cash flows used in financing activities** were (\$116,566) for the six-month period ended March 31, 2016 compared to (\$87,108) for the comparative period in 2015. The \$29,458 increase in cash used for financing activities was due to more shares of the Company being repurchased under the NCIB in 2016 than in 2015.

## **SHARE CAPITAL**

### **(a) Authorized**

Unlimited number of Class A voting Common Shares without par value  
 Unlimited number of preferred shares issuable in one or more series with rights and quantity subject to the discretion of the directors

### **(b) Issued and Outstanding**

As at March 31, 2016 the total number of common shares issued and outstanding was 15,840,135. As at the date of this MD&A the total number of common shares issued and outstanding was 15,607,679.

### **(c) Stock Options**

As at March 31, 2016 and the date of this MD&A a summary of stock options exercisable and outstanding is 1,525,000 Common Class A shares, having a weighted average exercise price of \$0.61 each.

## **RELATED PARTY TRANSACTIONS**

The retention of certain key management personnel is subject to a management agreement, the terms of which are on a month-to-month basis with no fixed expiry date. Upon resignation at the Company's request or in the event of a change of control, in addition to termination benefits equal to one month's severance, these

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT’S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

agreements provide for termination benefits that can include unpaid bonuses that currently includes a conditional general performance and retention bonus of \$53,075 which is only payable if, as, and to the extent that the CEO exercises certain options. The full amount of this bonus was accrued in the audited consolidated financial statements for the year ended September 30, 2010.

Key management includes current and former senior officers and directors (executive and non-executive) of the Company. The cost for services and short term benefits provided to the Company by key management has been recorded on the consolidated statement of income and comprehensive income and included in reported expenses for the period ended March 31 as follows:

For the six-month period ended March 31, 2016, the Company was involved in the following related party transactions:

	<b>For the six months ended March 31, 2016</b>	<b>For the six months ended March 31, 2015</b>
	\$	\$
Wages and benefits	<b>90,340</b>	80,290
Directors fees and expenses	<b>16,000</b>	20,000
	<b>106,340</b>	100,290

Included in accounts payable and accrued liabilities as at March 31, 2016 is \$59,323 (September 30, 2015 - \$135,944) due to the key management in consideration for unpaid remuneration and benefits and / or out-of-pocket expenses incurred in the course of fulfilling their responsibilities. The amounts owing were unsecured, non-interest bearing and due on demand.

Some key management personnel, or their related parties, may hold positions in other entities whose services are retained by the Company. In such instances, these appointments result in the Company's key management personnel representing those related parties in which they hold control or significant influence over the financial or operating policies of these entities.

As at March 31, 2016, the Company's investments at fair value include 5,200,000 shares in Black Eagle Mining Corporation (“BEM”) (2015-5,200,000) valued at \$nil (2015-\$6,240,000) which amounts to a 14.6% (2015-14.6%) interest in BEM. NEMI and BEM have two directors in common.

As at March 31, 2016, the Company's investments at fair value include 4,407,000 shares (2015–4,407,000) of Vangold Resources Ltd. (“VAN”) valued at \$nil (2015-\$22,270) which amounts to an 18.3% (2015-18.3%) interest in VAN. NEMI’s CEO has been a director of VAN since fiscal 2014.

As at March 31, 2016, the Company's investments at fair value include 2,175,000 shares (2015-2,000,000 shares) of Voleo valued at \$435,000 (2015-\$100,000) which amounts to a 11.3% (2014-13.3%) interest in that company. The founder and Chairman of Voleo is a director of NEMI.

As at March 31, 2016, the Company has a management services agreement with a private company with which the Company’s CFO exercises significant influence. During the six-month period ended March 31, 2016, the Company paid \$37,500 (2015 - \$37,500) to this private company.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

**FINANCIAL INSTRUMENTS**

**a) Fair value risk**

When participating in investment activities, the Company may incur losses if it is unable to resell the securities it has purchased or if it is forced to liquidate its holdings at less than their respective carrying values. The Company is also exposed to fair value risk as a result of its principal trading activities in publicly traded securities. All of the Company's investments at fair value through profit or loss are carried on a fair value through profit or loss basis and recorded at their fair value. As such, changes in fair value affect earnings as they occur.

The fair value of cash, GST recoverable, accounts receivable and accounts payable at March 31, 2016 and September 30, 2015 approximate their carrying values due to their short term to maturity.

The following table summarizes the effect on net income as a result of fair value changes in publicly traded securities at fair value through profit or loss as at March 31, 2016. This analysis assumes all other variables remain constant in accordance with the company's established accounting policies:

		<b>March 31, 2016</b>		
		<b>Reported carrying value</b>	<b>Effect of a 10% change in value on net income</b>	
			<b>Increase</b>	<b>(Decrease)</b>
		<b>\$</b>	<b>\$</b>	<b>\$</b>
Investments	at fair value	5,771,275	577,128	(577,128)

As all investments at fair value are carried on a fair value through profit or loss basis, changes in the market value are included in income for the year and have no potential effect on other comprehensive income.

As of March 31, 2016, the determination of estimated fair value as discussed in Note 6 of the Company's investment in publicly traded securities and private equity securities was as follows:

	<b>March 31, 2016</b>	<b>Estimated fair values</b>		
		<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
	<b>\$</b>	<b>\$</b>	<b>\$</b>	<b>\$</b>
Publicly traded securities	5,077,115	5,077,115	-	-
Private equity securities	694,160	-	-	694,160
	5,771,275	5,077,115	-	694,160

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

The Company's movement in Level 3 fair value through profit or loss securities consists of the following:

	<b>March 31,</b>
	<b>2016</b>
	<u>\$</u>
Balance, beginning of period	<b>3,169,427</b>
Advances/purchases for investments	<b>283,759</b>
Disposal of investments (net)	<b>(2,879,901)</b>
Market value adjustments (net)	-
Foreign exchange adjustments	<b>120,875</b>
Balance, end of period	<u><b>694,160</b></u>

**b) Market risk**

Market risk is the risk that the fair value or future cash flows from a financial instrument will fluctuate because of changes in market prices or prevailing conditions. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk and are disclosed as follows:

**i) Currency risk**

A portion of the Company's financial assets and liabilities is denominated in foreign currencies giving rise to risks from changes in foreign exchange rates. For every 1% change in the US-Canadian exchange rate, as at March 31, 2016, the Company is exposed to currency fluctuations as follows:

	Reported fair value	Effect of a 1% change in exchange rates	
		Increase	(Decrease)
	\$	\$	\$
US\$ investment in: (in CDN\$)			
Quoted marketable equities	2,520,730	25,207	(25,207)
	<u>2,520,730</u>	<u>25,207</u>	<u>(25,207)</u>

As at March 31, 2016, except for USD denominated investments at fair value having a market value of approximately \$2,520,730 (USD\$1,945,309) (September 30, 2015- \$5,038,573 (USD\$3,785,839)) all of the Company's financial instruments are held in Canadian dollars. At current levels of foreign investment, management does not believe a change of 1% in exchange rates would have a significant effect on the Company's business, financial condition and results of operations.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**ii) Interest rate risk**

Interest rate risk arises from the possibility that changes in interest rates will affect the fair value or future cash flows of financial instruments held by the Company. The Company incurs interest rate risk on its cash balances as well as with respect to the loan held. The Company attempts to minimize and monitor its exposure to interest rate risk by fixing rates of interest on its loans that are well in excess of normal market rates. The Company does not engage in the trading of futures in order to mitigate interest rate risk.

The following table provides the effect on net income (loss) for the six-month period ended March 31, 2016 if interest rates had increased or decreased by 1% applied to the reported balances as of those respective dates. This sensitivity analysis assumes all other variables are constant. The methodology used to calculate the interest rate sensitivity in each of the two years presented is consistent.

Financial instrument	Reported carrying value	March 31, 2016	
		Effect of a 1% change in interest rates	
		Increase	(Decrease)
	\$	\$	\$
Cash	5,139,778	51,398	(51,398)
	5,139,778	51,398	(51,398)

**iii) Price rate risk**

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Management closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

**c) Credit risk**

Credit risk is the risk of loss if a customer or third party to a financial instrument fails to meet its commercial obligations.

The majority of the Company's cash is held through a Canadian chartered bank and accordingly, the Company's exposure to credit risk is considered to be limited. From time-to time, cash may also consist of guaranteed investment certificates or Government of Canada treasury bills acceptances which have an original maturity of three months or less from the date of purchase and which are readily convertible into a known amount of cash.

**d) Liquidity risk**

The Company manages liquidity risk by maintaining sufficient cash balances to enable settlement of transactions on the due date. Accounts payable and accrued liabilities are all current and expected to be paid within one year.

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

**MANAGEMENT OF CAPITAL**

The Company's objectives when managing its capital are to maintain a flexible structure in order to optimize the cost of and return on capital at an acceptable level of risk, balancing the interests of both equity and debt holders while allowing for development of the business.

In addition to its cash holdings, marketable securities and other securities held-for-trading, the Company considers shareholders' equity, long term debt or debentures and short term borrowing to be components, from time to time, of capital under management. The Company does not currently have any short term credit facilities in place.

Current investment activity as it pertains to the management of marketable securities and other securities held-for-trading of the Company is ultimately limited to the extent of the Company's ability to liquidate existing investments on a timely and profitable basis and by the Company's ability to secure new financing through the issuance of new shares or incur debt, as required, in order to meet the objectives above. The Company monitors its capital based upon debt to equity and current asset to current liability ratios. The Company is not subject to externally imposed capital requirements.

**CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS**

The preparation of the financial statements in conformity with International Financial Reporting Standards ("IFRS") requires management to make estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

**(a) Critical accounting estimates**

Critical accounting estimates are estimates and assumptions made by management that may result in a material adjustment to the carrying amount of assets and liabilities within the next financial year included:

**i. Share-based payments**

All equity-settled, share-based awards issued by the Company are recorded at fair value using the Black-Scholes option pricing model. In assessing the fair value of equity-based compensation, estimates have to be made regarding the expected volatility in share price, option life, dividend yield, risk-free rate and estimated forfeitures at the initial grant date.

**ii. Income tax**

Tax provisions are based on enacted or substantively enacted laws. Changes in those laws could affect amounts recognized in profit or loss both in the period of change, which would include any impact on cumulative provisions, and in future periods. Deferred tax assets (if any) are recognized only to the extent it is considered probable that those assets will be recoverable. This involves an assessment of when those deferred tax assets are likely to reverse and a judgment as to whether or not there will be sufficient taxable profits available to offset the tax assets when they do reverse. This requires assumptions regarding future profitability and is therefore inherently uncertain. To

**NEMI NORTHERN ENERGY & MINING INC.**  
**INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS**  
**AS AT AND FOR THE SIX MONTHS ENDED MARCH 31, 2016**

---

the extent assumptions regarding future profitability change, there can be an increase or decrease in the amounts recognized in respect of deferred tax assets as well as the amounts recognized in profit or loss in the period in which the change occurs.

**iii. Valuation of investments at fair value**

The Company recognizes its investments at fair value. Fair value is determined on the basis of market prices from independent sources, if available. If there is no market price, then the fair value is determined by using valuation models. The inputs to these models, such as discount rates and gold curve prices, are derived from observable market data where possible, but where observable data is not available, judgment is required to establish fair values.

There is inherent uncertainty and imprecision in estimating the factors that can affect fair value, and in estimating fair values generally, when observable data is not available. Changes in assumptions and inputs used in valuing financial instruments could affect reported fair values.

**(b) Critical accounting judgements**

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the statements are, but are not limited to, the following:

**i. Determination of functional currency**

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currency of NEMI and Crossroad Ventures Inc., is the Canadian dollar, and the functional currency of ACME is the United States dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21.

Foreign currency transactions are translated into the relevant functional currency using the exchange rates prevailing at the dates of the transactions. At the end of each reporting period, the monetary assets and liabilities of the Company that are determined in foreign amounts are translated at the rate of exchange at the date of the statement of financial position. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of loss.

The Company's presentation currency is in the Canadian dollar.

The results and statements of financial position of the Company's subsidiary with a functional currency that is different from the presentation currency are translated into the presentation currency as follows:

Assets and liabilities of entities with a functional currency other than the Canadian Dollar are translated at the period end rates of exchange, the results of their operations are translated at average rates of exchange for the period, and items of equity are translated at historical rates. The

resulting changes are recognized in accumulated other comprehensive income ("AOCI") in equity as a translation adjustment.

**ii. Going Concern**

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, these consolidated financial statements continue to be prepared on a going concern basis.

**CHANGES IN ACCOUNTING POLICIES**

There has been no material impact on these financial statements from changes in accounting standards during the period.

**NEW ACCOUNTING PRONOUNCEMENTS ADOPTED**

The following standards and amendments to existing standards have been adopted by the Company effective October 1, 2015:

IFRS 7 (Amended) - Financial instruments: Disclosures, effective for annual periods beginning on or after January 1, 2015.

The adoption of these standards did not have an impact on the financial statements.

**RECENT ACCOUNTING PRONOUNCEMENTS**

A number of new IFRS standards, amendments to standards and interpretations are not yet effective for the period ended March 31, 2016, and have not been applied in preparing these condensed interim consolidated financial statements. None of these is expected to have an effect on the Company's financial statements:

IFRS 9 - New standard that replaced IAS 39 for classification and measurement, effective for annual periods beginning on or after January 1, 2018.

**OFF-BALANCE SHEET ARRANGEMENTS**

NEMI has not entered into any material off-balance sheet arrangements such as guarantee contracts, contingent interests in assets transferred to unconsolidated entities, derivative financial obligations, or with respect to any obligations under a variable interest equity arrangement.

**DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROL OVER FINANCIAL REPORTING**

**Disclosure controls and procedures**

The Company's disclosure controls and procedures are designed to provide reasonable assurance that material items requiring disclosure by the Company are identified and reported in a timely manner.

Based on current securities legislation in Canada, the Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO") of the Company have evaluated the design and effectiveness of the Company's disclosure controls and procedures as of March 31, 2016, and have concluded that such disclosure controls and procedures were operating effectively at that date.

There were no significant changes to the Company's disclosure controls process during the six-month period ended March 31, 2016.

It should be noted that while the Company's CEO and CFO believe that the Company's disclosure controls and procedures provide a reasonable level of assurance that they are effective, they do not expect that the disclosure controls and procedures can prevent all errors or mistakes. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

**Internal controls over financial reporting**

Management is responsible for designing, establishing and maintaining a system of internal controls over financial reporting to provide reasonable assurance that the financial information prepared by the Company for external purposes is reliable and has been recorded, processed and reported in an accurate and timely manner in accordance with IFRS.

The Board of Directors is responsible for ensuring that management fulfils its responsibilities. The Audit Committee fulfils its role of ensuring the integrity of the reported information through its review of the interim and annual financial statements.

There are inherent limitations in the effectiveness of internal controls over financial reporting, including the possibility that misstatements may not be prevented or detected. Accordingly, even effective internal controls over financial reporting can provide only reasonable assurance with respect to financial statement preparation. Furthermore, the effectiveness of internal controls can change with circumstances. The Company has paid particular attention to segregation of duties and matters surrounding its internal controls over financial reporting as the Company has only limited staff resources at the present time such that "ideal" segregation of duties is not feasible. This risk is dealt with by management and any identified compensating controls such as Board or senior management review are implemented where appropriate. At the present time, the Company does not anticipate hiring additional accounting or administrative staff as this is not considered necessary or practical and accordingly, will continue to rely on review procedures to detect potential misstatements in reporting of material to the public.

The CEO and the CFO have evaluated the design and effectiveness of internal controls over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this evaluation, as at March 31, 2016, the

---

Company believes that its internal controls over financial reporting were designed and operating effectively to provide reasonable, but not absolute, assurance that the objectives of the control system are met.

The Company's management, including the CEO and CFO, believe that any internal controls over financial reporting, including those systems determined to be effective and no matter how well conceived and operated, have inherent limitations and can provide only reasonable, not absolute, assurance that the objectives of the control system are met with respect to financial statement preparation and presentation. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

The Company continues to review and assess its internal controls over financial reporting. There were no significant changes made to internal controls over financial reporting during the six-month period ended March 31, 2016.
